

INTRODUCING
NEW DECORATOR FOIL
BALLOONS

FROM

A brand new concept has arrived Exclusive to Anagram!

Introducing the new Anagram Decorator Foil Shapes which will, in combination with an expanded range of sizes in Solid Color Stars and Hearts, revolutionise the way in which foil balloons are used in balloon decoration and retail.

These versatile balloons can be used in bouquets and bunches and to create arches columns, swags and elegant, whimsical sculptures. These new decorator shapes bring a rhythm and sense of movement to every project.

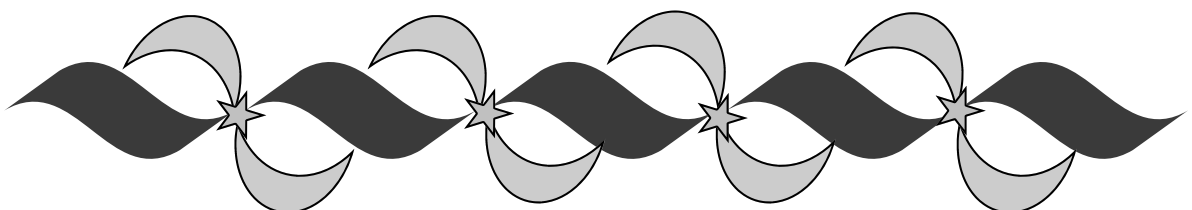

And, when connected together, you can fill space the spaces created between the balloons more quickly and more economically than latex!

The line consists of:

- Five sizes of Curves
- Four sizes of Crescents
- Four sizes of Hearts
- Four sizes of Stars

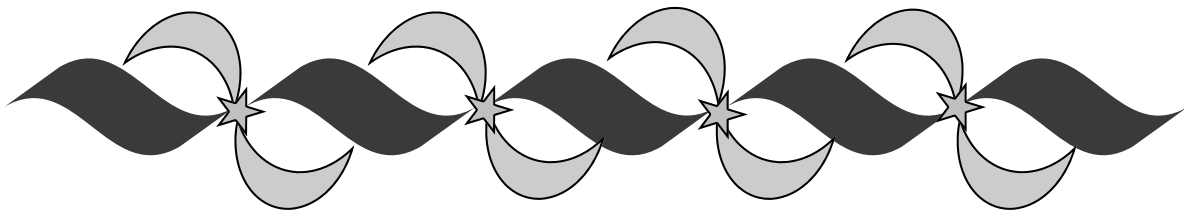

Available NOW in:

Fuchsia	Pastel Pink	Red
Blue	Pastel Blue	Green
Gold	Lime	Purple
Holographic	Silver	Lilac

Specifications

15" Curve	Unvalved	Air Fill
19" Curve	Valved	Air Fill
28" Curve	Valved	Air Fill
36" Curve	Valved	Air or Helium Fill
42" Curve	Valved	Air or Helium Fill
10" Crescent	Unvalved	Air Fill
17" Crescent	Valved	Air Fill
26" Crescent	Valved	Air or Helium Fill
35" Crescent	Valved	Air or Helium Fill
4" Heart	Unvalved	Air Fill
9" Heart	Unvalved	Air Fill
18" Heart	Valved	Air or Helium Fill
Jumbo Heart	Valved	Air or Helium Fill
4" Star	Unvalved	Air Fill
9" Star	Unvalved	Air Fill
19" Star	Valved	Air or Helium Fill
Jumbo Star	Valved	Air or Helium Fill

How do they work?

You can create an almost unlimited combination of shapes and styles when the Decorator shapes are connected together using a variety of simple techniques. The balloons have been specifically designed to pack together so that the internal curves of one balloon will fit around the external curves of another enabling the designer to create solid shapes as well as more open, stylish designs.

Techniques for Connecting

The balloons connect in three basic ways and, using simple techniques, they can create strong, large scale décor as well as smaller scale designs.

1. Point to point

Whenever two or more balloons meet at their points, they can be connected very strongly by overlapping the points a little and securing them tightly with a small cable tie. Very large arches and swags can be created in this way.

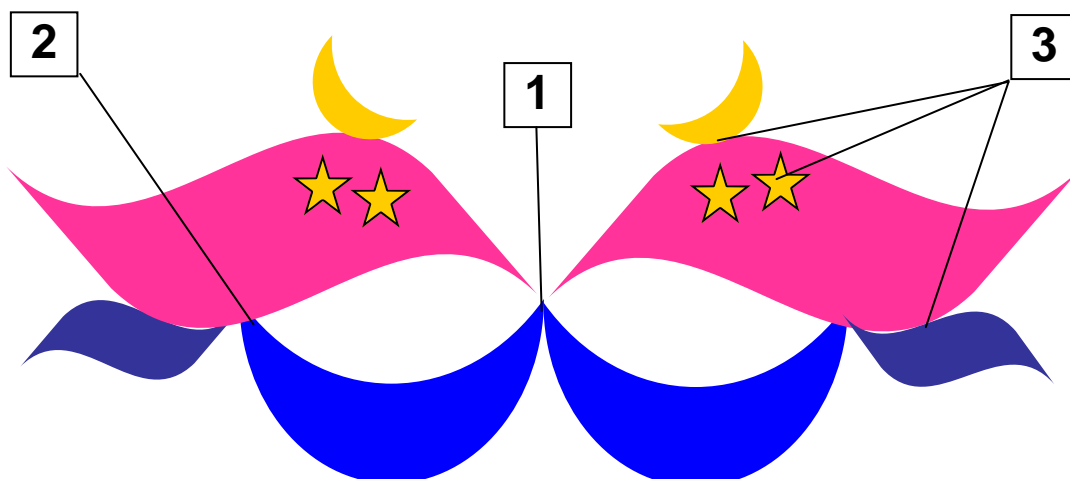

2. Point to edge (or face)

Wherever the point of one balloon meets the edge (or face) of another, the balloons can be connected either with clear adhesive tape (best for point to edge) or a small square of self adhesive Velcro tape. (this works well for both situations, but is particularly good for point to face connections)

3. Edge (or Face) to Edge (or Face)

In all of these cases, the best method of connection is to use small pieces of self adhesive Velcro tape.

Example

Set your imagination free.
What can you create?
