

SMOOCHY LIPS

Created By Chris Horne, Amscan International Limited.

Very simple and very effective – this design makes a perfect delivery as it can't tangle in the wind!

Product Required:

- 4 x 11" Fab Fuchsia Anagram decorator Latex balloons (990059)
- 4 x 11" Passion Red Anagram decorator Latex balloons (990065)
- 1 x Smoochy Lips Supershape (0874902)
- 1 x Heart Jumbo Swirl decoration (221700)
- 1 x Double Red Heart weight (11711)

Construction Method:

1. Inflate the Smoochy Lips foil balloon with helium and attach to a length of monofilament. Attach the other end to the weight.
2. Inflate two of the 11" balloons with helium to 11" and tie into a duplet.
3. Inflate two more and tie into a duplet, then twist this duplet into the first to create a cluster of 4 balloons.
4. Create two further duplets with the remaining 11" Balloons and twist them one at a time into the cluster of 4 until you have created a cluster of 8. Arrange the balloons so that the colours are as you want them.
5. Push the cluster onto the monofilament below the Smoochy lips balloon and wrap the monofilament around the centre of the cluster to secure.
6. Finally, use a short piece of monofilament to tie the Jumbo swirl underneath the cluster of latex balloons.

TIP: Use Ultra Hi-Float in the latex balloons to extend the overall flying time of this design!

TIP: Wind the Jumbo Swirl around the monofilament so that it hangs symmetrically, and tape the lowest heart to the monofilament to keep it in place
