

DRAGON

Created By Chris Horne, Amscan International Limited.

Very dynamic and exciting, this design is great for décor, window display and even for parades! Best when air-filled, it works for many situations...

Product Required:

- 1 x Chinatown Dragon Supershape: (1137802)
- 3 x 36” Gold Anagram Decorator foil Curves: (1614399)
- 5 x 28” Gold Anagram Decorator foil Curves: (1614199)
- 5 x 19” Gold Anagram

Decorator foil Curves: (1613999)

- 5 x 15” Gold Anagram Decorator foil Curves: (1611199)
- 4 x 10” Red Anagram Decorator foil Crescents (1668299)
- Cable ties
- Self-adhesive hook and loop tape

Construction Method:

1. Inflate all the balloons with air. The 15” Curves will need to be heat-sealed, but the rest have valves and will seal themselves.
2. Begin with the Chinatown Dragon shape, attaching all three of the 36” curves to the points on the rear with cable ties. Attach the curves to each other using hook and loop tape. This creates the “base” for the rest of the design.
3. Tape up the tails of all the other balloons, and add them to the “base” as required. Add them in layers, using hook and loop tape, to build up a 3D design, ensuring that there are overlaps to add rigidity.
4. Continue building up the design adding balloons as necessary. Not all balloons may be required.

Estimated Labour time: 20 minutes.

TIP: This dragon will vary in shape and appearance depending on the placement of balloons, lending great interest to the design. It can be made large, smaller, longer, taller etc as required. It can even be mounted on bamboo canes (or similar) to enable it to be carried in parades.
